- Developed a professional attitude towards correct clinical handover

Learning Methodology

- Interactive live session with mentors
- Online lectures and video demonstrations
- Materials will be available through Learning management system (Includes PPTs, notes, further reading, videos etc.,)

About the CIMED

The Certificate Course in Intervention in Medical Emergencies in Dental Practice, the CIMED is designed to equip you with the skills you need to effectively handle stressful situations and save the lives of your patients. It is designed to teach you the practical and comprehensive steps you need to take to effectively manage an emergency at your dental practice. The course will cover everything you need to know about preventing and responding to an emergency at your practice. We'll cover preventive strategies, preparedness, and how to respond to an emergency in a systematic way to save a patient's life. We believe that all health care professionals should have a basic understanding of emergency management. Once you've completed this course, you'll have the confidence and skills you need to respond at the right time and manage an emergency effectively.

A methodical, focused, and structured learning program that gives learners the foundational knowledge and abilities they need to react correctly in an emergency in a regular dentist office. The CIMED also teaches participants how to prevent medical emergencies and how to handle them step-by-step, should they occur.

CIMED Content

- ✓ ABCDE approach to an Emergency Patient
- ✓ Vasovagal Syncope (simple faint)
- ✓ Hyperventilation, Respiratory Distress and Asthma
- ✓ Cardiac Chest Pain
- ✓ Epileptic Seizures
- ✓ Shock
- ✓ Allergic or Hypersensitivity Reaction
- ✓ LA Emergencies
